

Interoperability and Integration Solutions

Integrated Systems Management, Inc. provides world-class software engineering, integration, interoperability and information technology solutions that assist healthcare organizations solve a broad range of business challenges, capture unforeseen opportunities and achieve exceptional results. We bring a wealth of experience and knowledge in healthcare.

We are a leading provider of interoperability and integration solutions to hospitals, clinics, EHR vendors, labs, HIEs, ACOs and payers.

Headquartered in Hawthorne, NY, we have created a 24-hour development and support platform to offer our clients faster turnaround and excellent quality; at very affordable rates.

245 SAW MILL RIVER ROAD, SUITE 311, HAWTHORNE, NY 10532

We have more than 200+ pool of skilled professionals with average 5+ years of experience in development, maintenance and support.

We aggregate 500+ Years of healthcare domain development, maintenance and support experience.

Solutions For EHR and PM/RCM Vendors

Increasing Electronic Health Records (EHR) awareness and adoption is leading provider organizations which are still on paper charts to look out for a suitable one and at the same time the organizations having one already are driven to upgrade to a more appropriate advanced system according to their specific requirements.

We have been working with EHR and PM/RCM Vendors for over a decade now and we very well understand the several IT related challenges-issues involved like migrating the old legacy data from the existing EHR; or seamless connectivity concerns for the practices using EHR and Practice Management (PM) from separate vendors.

Our offerings are focused towards growing EHR/PM system acceptance by practices overpowering the challenges.

Our partnerships with EHR and PM/RCM Vendors let them focus on building advanced-comprehensive systems, expedites the adoption and implementation process eventually acquiring more clients.

Integrated Systems Management (ISM) is an Application development partner to Intersystems.

ISM has extensive experience in FHIR (Fast Healthcare Interoperability Resources) and InterSystems IRIS for Health; world's first and only data platform specifically engineered to extract value from healthcare data spanning data management, interoperability, transaction processing, data normalization and analytics, providing capabilities for building complex, mission-critical, data-intensive applications quickly.

At ISM we have designed, implemented and supported many interoperability and integration projects for EHR and PM/RCM Vendors ensuring the benefits like:

IMPROVED DATA USAGE

Seamless, real-time and true views of patient and clinical data ensuring optimised patient safety, productivity and quicker movement along the care pathway.

RELIABLE CONNECTION

Reliable secure connectivity between disperse systems like EHR, PM, LIS, RIS or HIS.

COST-SAVINGS

Refreshing and modernizing existing systems; helping save time and staff overheads with increases productivity.

ANALYTICS & INSIGHTS

Releasing, combining and transforming trapped healthcare data into useful information enabling better decision-making, more efficient processes and enhanced patient experience.

Solutions and Services For EHR and PM/RCM Vendors

Our cost-effective comprehensive solutions and services for EHR and PM/RCM Vendors includes:

EHR Data Extraction & Conversion

- Proven and Cost-Effective
- Specialized expertise with highly customized data extraction and conversion
- Data conversion tools for cross-reference mapping, testing and project management

EHR-Archiving

- Cloud-based, vendor agnostic secure low-cost solution
- Comply with Federal Regulations
- Maintain Continuity of Care
- Expedite the roll out the new EHR
- Structured patient records, searchable in seconds; set up, hosted, managed and monitored by ISM
- Anywhere, anytime access

Laboratory Orders & Results Interface

- Single Hub Connection Interface Engine Solution at No cost to EHR Vendors
- Built-in connectivity to hundreds of labs
- No internal development for new interfaces
- Management of all the interfaces from start to finish
- Dedicated project management team
- LIVE ongoing support throughout the process
- Access to full tracking system to view/manage our progress
- Speedy interface implementations
- VPN Elimination
- Secure HIPAA compliant data transfers

Charge Interface from EHR/PM

- Eliminate Errors
- Save Time
- Eliminate duplicate entry for demographics and billing transactions
