Home Healthcare Solutions

Document Review

Our quality assurance centre facilitates caregiver's completed documents reviewing, approving or returning them for correction

Prior authorization tracking and monitoring

Automates compliance with payers' requirements for prior authorization

Scheduling

View schedules from the angle of a patient, caregiver or agency as a whole. In-built alert system warns the user about potential conflicts or issues with compliance

Medicare eligibility

Real-time Medicare eligibility verification

Electronic Visit Verification (EVV)

EVV facilitates caregivers with the tool for checking the schedules, capture patient's electronic signature and complete plan of care-based visit notes. EVV provides "live monitoring" capability to the agency to monitor visibility on home visits that are in progress as well as delays and no-shows.

Dashboards and analytics

Comprehensive custom configurable dashboard with real time analytics

OASIS Documentation

Integrated OASIS documentation with built-in analyser
